T-STREAMER

Cyber Secure Data Broker

When Operational Integrity Meets Cyber Security

Cyber Secure Data Broker

With the increasing need to outsource engineering support, remote connectivity and access to process data is becoming increasingly essential.

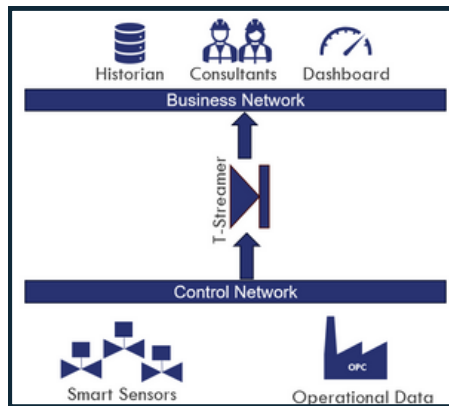

The T-Streamer Data Broker, in conjunction with the FEND Data Diode, offers a simple and 100% secure solution to protect your operational infrastructure.

Cyber Secure Data Broker

OT Network Segregation

Commonly used to separate the operation (control) network from the business (IT) network, the T-Streamer solution can also be used in conjunction with a 5G or satellite internet solution to stream data to a centralized database from extremely remote areas.

Network Segregation with T-Streamer

Pre-Configured Package with Two Industrial PCs

The compact, DIN-Rail mounted package comes with two industrial PCs, allowing for seamless integration into your existing infrastructure without compromising the resources of your existing hardware.

The solution is also available in a compact server rack mount.

DIN Rail Mounted Cyber Secure Solution

HIGH THROUGHPUT

Capable of forwarding up to **15 000 points per second**

SOURCES & DESTINATIONS

Compatible sources:

- ✓ OPC DA
- ✓ OPC UA
- ✓ Fend Data Diode

Compatible destinations:

- ✓ OPC UA
- ✓ MQTT
- ✓ InfluxDB Server
- ✓ Fend Data Diode

HOSTING OPTIONS

Available in a pre-configured package with two industrial PCs to support the OT and IT data broker service, or as an installer package to host on pre-existing machines.
